PROFESSIONAL SUMMARY

I am a Software Engineer specializing in Backend and Smart Contract development. I am also an active participant in hackathons related to Web3 and Blockchain.

I have experience working with a wide range of modern technologies in both Backend and Frontend development, across Web2 and Web3 paradigms.

I have built scalable backend systems, integrated AI/LLM agents into workflows, developing full-stack Web3 applications with smart contracts.

EDUCATION

- Have certificate for course “Solidity for Blockchain development”
-

WORK EXPERIENCE

Middle Fullstack Developer

[Aimpect.dev](#) | Build Web3 apps by chatting with AI

April 2025 - Present

Hybrid (Kyiv, Ukraine)

- Worked with a frontend and backend of app
- Worked with Web3 auth and transactions on client and server side
- Worked with a complex AI Agent system

Middle NodeJS Backend Developer

[Finup](#) | Fintech card company

June 2025 – Present

Remote (Kyiv, Ukraine)

- Worked with a bank system, crypto deposits tracking in different blockchains, advanced security techniques.
- Worked on a card system. Issuing, transfers, 3Ds confirmations in card providers.
- Wallet transfers, converting fiat to crypto by actual rate, detailed ledger with logs.
- Scalable Kafka messages system

Python Backend Developer

[Generect](#) | Ledgen SaaS tool

November 2024 – February 2025

Remote (Kyiv, Ukraine)

- Backend developer on all backend services of the company.
- Worked with a hard task queue system and a big amount of data.
- Worked with parsing system for LinkedIn and big amount of data processing/transformation.

Junior NodeJS Backend Developer

[Finup](#) | Fintech card company

January 2024 – June 2024

Office (Kyiv, Ukraine)

- Worked with a bank system, crypto deposits tracking in different blockchains.
 - Worked on a card system. Issuing, transfers, 3Ds confirmations in card providers.
 - Wallet transfers, converting fiat to crypto by actual rate, detailed ledger with logs.
-

SKILLS

- **Programming languages:** Python, Typescript, Golang, C, Solidity
 - **Backend:**
 - **Python:** Django, Flask, FastAPI
 - **TypeScript:** NestJS, Hono, Express.js, tRPC
 - **Golang:** Gin
 - **Tools:** TypeORM, DjangoORM, Drizzle, SQLAlchemy, Flyway, Alembic
 - **Message/Task Brokkers:** Kafka, Celery
 - **API Architectures:** REST, GraphQL, RPC, gRPC, Websocket
 - **Frontend:** React, NextJS, RemixJS, ViteJS, Tailwind, Unocss
 - **Databases:** PostgreSQL, MySQL, MongoDB, Redis
 - **DevOps:** Docker compose, Github Actions, git pre-commits, Nginx, AWS
 - **Misc:** Team work, Linux terminal, Git, Telegram bots, Discord bots, experience building complex workflows using LLMs, many experience with LLMs and AI tools, experience with Rust
 - **Tools & Environments:** Git, Linux terminal (Ubuntu, Debian), Docker, Docker Compose, Mintlify
 - **Smart contracts:** Solidity, Vyper, Hardhat, Truffle, Foundry, OpenZeppelin, Chainlink (VRF, Oracles)
 - **Project Management:** Jira, Notion, Linear, HackMD
 - **Data & Monitoring:** Data visualization or logging via code (Excel / CSV, Telegram Bots, Sentry, Pandas, Matplotlib)
 - **Design:** Photoshop, Figma
 - **Soft Skills:** critical thinking, problem-solving, teamwork, communication, proactiveness
 - **Languages:** English (B1), Ukrainian (C2), Russian (C2)
-

MISC

- Winner of 5 Ethereum (EthKyiv), 1 TON Hackathons and 1 Solana Colosseum Hackathon: TerminalX (TON), Orius Finance, govAI, QuestHook, SentiAI, AImpact.dev (Solana).
- I am planning to go to Poland or Germany or Austria for university.
- Have some technical and non technical writing skills. I have my own TG channel about web3 technologies and an active X account.
- I am actively involved in the cryptocurrency and stock markets.
- My personal site: <https://serhiifotex.dev/>
